1 year, 2 months

RT-RK, Junior Embedded Software Engineer

Feb 2019 - Aug 2019

I was working as a part of a platform testing team that used Agile management methodology.

My primary responsibility was writing high-maintenance tests for automated testing.

As a secondary task, I was asked to write scripts that turned results into a human-readable documents.

full-time

7 months

Amadria Park, IT Technician Assistant

Jun 2018 - Sep 2018

My responsibility as a technician was to repair and install IP cameras, test and replace switch ports to make sure the hotel rooms had a stable connection.

Additional responsibilities included:

- Installing the required OS for the hotel's reception computers.
- Testing the validity of network cables.
- Physically installing switch modules.
- Maintaining access points across the complex.

Education

OBRIS, Web Application Developer

Oct 2016 - Nov 2016

In the course of three months, I learned the foundation of server-side programming as well as the basics of HTML, CSS and JavaScript.

While I was learning, I got a job as a web developer.

As the final assessment, we were asked to create a Laravel application that ran on a server.
